OBJECTIVE

Java Full Stack Developer skilled in Java, Spring Boot, React, MySQL, and REST APIs, with hands-on experience building full-stack and frontend web applications through a software internship and independent projects. Seeking a stipend-paying software development internship to contribute to backend and frontend engineering teams while growing production-level development skills.

SKILLS

Web Technology: HTML, CSS, Tailwind CSS, JavaScript, React JS

Backend: Java, Python (basics), JDBC, Hibernate, Spring Boot (REST APIs, Spring Security, JWT)

Database: MySQL, SQL, MongoDB (basics)

Tools: Git, GitHub, Postman, Eclipse, VS Code, MySQL Workbench, Docker (basics), Linux CLI

PROFESSIONAL EXPERIENCE

Java Full Stack Intern — Test Yantra Software Solutions

Jan 2025 – May 2025

- Built and maintained 2–3 full-stack web application modules using Java, Spring Boot, and React as part of a 4–6 member development team, gaining hands-on experience across the complete SDLC.
- Collaborated daily with senior developers under professional mentorship, applying backend and frontend best practices while consistently meeting project deadlines across a 5-month internship.

PROJECTS

FreshMart — Frontend Grocery Shopping Platform (React)

- Developed a fully responsive frontend e-commerce UI in React for a grocery shopping platform, building 10+ reusable components covering product browsing, cart, and checkout flow.
- Implemented client-side product categorization, cart-state management, and a multi-step checkout UI, focused on mobile-first responsive design across screen sizes.

DataStory AI — AI-Powered Data Insights Platform

- Built a full-stack application that lets users upload CSV, Excel, and PDF files and automatically generates summarized, data-driven insights using backend processing APIs.
- Implemented an end-to-end file upload and parsing pipeline in React and REST APIs, handling 3 distinct file formats and rendering results through interactive visualizations.
